CADACUS
SOLUTIONS
FOR SYSPRO

Cadacus, Inc. has been providing solutions to the SYSPRO user community *since 1991.*

Advanced Order Management Solution For SYSPRO

Integrates with the SYSPRO Sales Order Module

Single or two-stage release to your warehouse floor

Cadacus Advanced Order Management Solution for SYSPRO helps to deliver product to the customers who need it most by managing the allocation of stock based on ship dates, fill-rates and customer and order hierarchies.
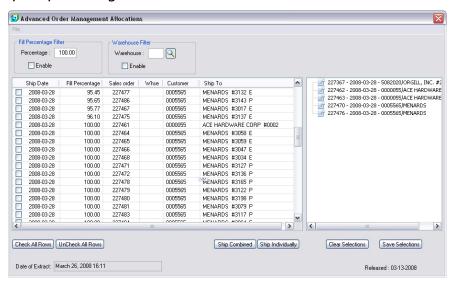

Key Benefits
- Calculates available fill rates to minimize backorders
- Automatically prints picking/packing documents
- For paperless picking, orders flow automatically to the **Cadacus Handheld Solution for SYSPRO**

Cadacus Advanced Order Management Solution for SYSPRO enables you to control which orders get product allocations and the sequence in which the orders are processed by your warehouse. The optional two-stage release enables your front office to decide where to allocate product, while your warehouse decides the best picking order.

Cadacus Advanced Order Management Solution for SYSPRO eliminates the need for running backorder releases by stock code by showing you the overall fill-rate for <u>all</u> available orders.

Cadacus Advanced Order Management Solution for SYSPRO enables the establishment of customer and order hierarchies to ensure your product goes where it is needed first.
